*starts now*

## Find It DIY

*(This contains small objects that a child could choke on if it breaks. Please do not leave your child unattended with the Find It bottle.)*

**Recommended Age:** 18-24 Months

**STEM concepts:** Science (physical science), math (classification, measurement)

**Materials:** an empty clear bottle with a lid, rice, super glue, little objects that can fit through the bottle's neck (examples: puff balls, marbles, buttons, a small toy animal, etc.)

**What to do:** Fill the bottle with a small amount of rice, add some of the small pieces, add some more rice and repeat until you've added all of the small items into the bottle. Do not fill the bottle completely! Put a small amount of super glue on the inside of the cap and screw the cap on. Allow the glue some time to completely seal or dry.

**Language and Communication:** Encourage your child to find the things you've hidden in the rice.

**Expand the Activity:** Turn it into a shaker for a fun music toy
